

SMART COLUMBUS OVERVIEW

A historical black and white photograph of a very crowded city street, likely in the late 19th or early 20th century. The street is filled with numerous horse-drawn carriages and a large number of pedestrians. The buildings lining the street are multi-story and feature classical architectural elements like windows and cornices. The overall scene depicts a busy, bustling urban environment.

FOR OUR FUTURE.**

**OUR CITY
AS LIVING
LABORATORY. TEST,
LEARN, ITERATE.**

**OUR NEW WAY OF
LIFE.
EMBRACE
THE CHANGE.**

OUR FOUNDATION. BUILDING BLOCKS FOR OUR FUTURE.

OPEN DATA OPERATING SYSTEM

The **Smart Columbus Operating System** aims to solve urban mobility and transportation challenges by efficiently matching supply with demand, catering to individual preferences, and ensuring adherence to regulatory guidelines

GRID MODERNIZATION

Modernize the electric grid through utility scale renewables. Improve efficiencies and deploy smart meters. A joint effort of AEP and the city.

CHARGING STATIONS

Install new charging stations on corporate campuses, public streets, and in residential developments, to help make electric vehicles the easy choice for individuals and businesses in Columbus.

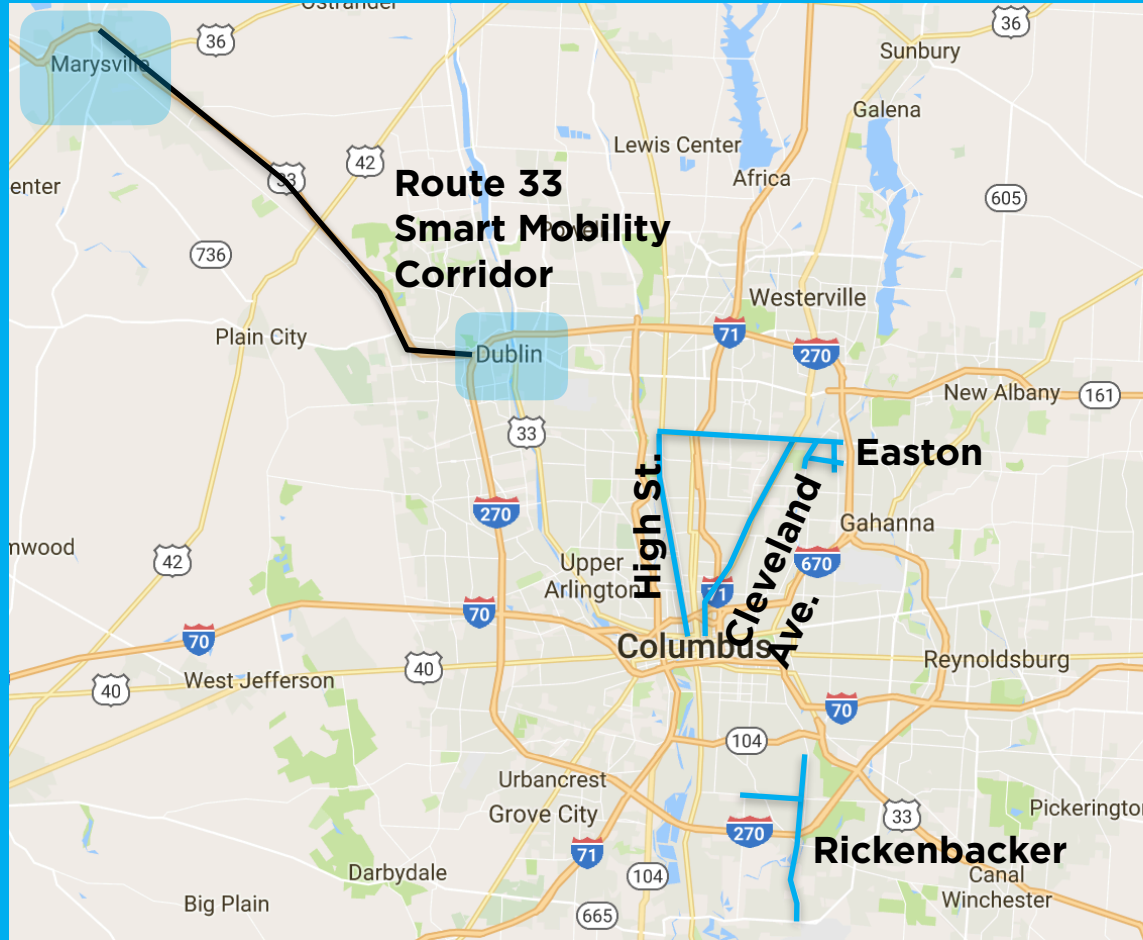

CONNECTED VEHICLE ENVIRONMENT

179 intersections and 4,500 cars, trucks, and buses will be connected in the Columbus Region by 2020.

CONNECTED VEHICLE ENVIRONMENT

Regional CVE Pilots Total

- **179 Intersections**
 - 147 City of Columbus
 - 27 City of Marysville
 - 5 City of Dublin
- **4,500 cars, trucks and buses** connected in the Columbus Region by 2020
 - 3,000 City of Columbus
 - 1,500 Marysville/US 33

OUR CITY AS LIVING LABORATORY. TEST, LEARN, ITERATE.

AUTONOMOUS VEHICLES

We will be demonstrating connected, autonomous, shared electric shuttles at Easton to help people move within the retail corridor. This will also extend our public transit services, taking people who work there directly to their jobs.

TRUCK PLATOONING

Columbus will demonstrate what the future of logistics could look like by electronically coupling long-haul trucks with sensors.

LADDERS OF OPPORTUNITY

Linden will be the first neighborhood where we will reverse the mistakes of the past by using technology, new mobility services, and smart urban planning to create ladders of opportunity, ensuring all Columbus residents have a place in our future.

DISTRICTS

**RESIDENTIAL
DISTRICT**

**COMMERCIAL

**LOGISTICS
DISTRICT**

PILOT AUTONOMOUS VEHICLES

Demonstrate autonomous vehicle technology on Columbus Region roadways. The technology will be proven at the **Transportation Research Center (TRC)** near Marysville, and further tested on campus at **The Ohio State University**. By 2020, our learnings will graduate to our city's streets, with connected, autonomous, shared electric shuttles at **Easton** to help people move within the retail corridor. This will also extend our public transit services, taking people who work there directly to their jobs.

Progress Highlights

- Conducted end user engagement with workforce survey in Easton area
- Exploratory meetings conducted with AV manufacturers
- Ohio State finalizing purchasing agreement with Local Motors for an Olli that will be co-developed in collaboration with the engineering school on campus.

PLATOONING

Fig. 2. A two-truck platoon with wireless communication and radar technology

Progress Highlights

- Route revised
- ODW engaged

LADDERS OF OPPORTUNITY

- Underpinning theme of our application and projects is that ***Mobility is the great equalizer of the twenty-first century***
- Open, equitable access to transportation can give our residents access to ladders of opportunity; empowering them to better their lives
- Will allow for access to healthcare, school, job training and jobs
- Will help solve for many of the challenges we are facing as the 14th largest city in the US

Progress Highlights

- Weekend Resident Engagement Session in February
- Neighborhood Focus Groups Conducted
- Proposal adapted to reflect feedback from Residents

OUR NEW WAY OF LIFE. EMBRACE THE CHANGE.

ELECTRIC VEHICLE ADOPTION

We will aggressively grow the electric market in Columbus: add them to public and private fleets, secure a supply of new and used models, prepare dealers and service people, and educate consumers.

INTEGRATED SOLUTIONS & SEAMLESS USER EXPERIENCE

Simple, integrated solutions will create a much friendlier user experience: to navigate, plan routes, and pay fares with different modes of transport, from pick up to parking.

MULTIMODAL OPTIONS

To decrease our high dependency on personal ownership, we'll bring people on board to grow our ecosystem with more options, including improving existing services and adding new services that address more needs throughout the region.
